SUMMARY

Software Engineer with 3+ years designing full-stack solutions for business process automation, B2B integrations and transactional flows (payments, CRM, messaging). Experienced in relational and multi-tenant data modeling (PostgreSQL, SQL Server) and in leading end-to-end solutions with React, Next.js, Node.js and C#/.NET. Co-founder of Pulso Studio. English C1.

EXPERIENCE

Co-Founder & Software Engineer · Pulso Studio — Feb 2026 – Present

Technical consulting studio building B2B operational solutions. pulsostudio.site

- Define the architecture and stack of each solution with the client, weighing cost, scalability and maintainability.
- **Crew:** evolved an in-house tool for a climbing gym into a multi-tenant SaaS for access control and bookings, with dynamic QR codes and recurring subscriptions via Mercado Pago.
- **Compass:** internal platform unifying CRM, projects and finances; multi-tenant PostgreSQL schema with Row Level Security and optimistic updates with TanStack Query.
- **Monteca:** insurance policy management system (React + Supabase), B2B landing page and n8n pipelines that automate client messaging and notifications.

Full Stack Developer · ANT Automation — Jul 2023 – Mar 2026

Corporate dashboards and backend services for internal industrial automation platforms.

- Built real-time operational metrics dashboards (React, Redux, Material UI, Highcharts).
- Designed backend services in C# / .NET with Entity Framework over SQL Server, optimizing critical queries for high-volume reports.
- Modeled and maintained relational schemas across multiple internal modules.
- Implemented custom plugins integrating external APIs and standardized environments with Docker.

Full Stack Developer · Coneq — Dec 2024 – Jan 2025

Responsive, multilingual (i18n) corporate website for an engineering firm, with SEO, forms and interactive maps.

Front End Developer · QXM (Quien x mi) — Sep 2023 – Dec 2023

Landing pages and dashboards with reusable components in React and Angular, integrated with a NestJS backend.

PROJECTS

B2B conversational agent — n8n agent with Claude API on Telegram, integrated with Salesforce (REST, SOQL, Apex) to query the catalog and create orders in real time.

Brief — Automated news platform: n8n ETL pipeline, PostgreSQL (Supabase) and a daily newsletter with no manual intervention.

Mountain Project Scraper — Playwright scraper with exponential backoff retries and fallback selectors.
github.com/Lauta2712/mountain-project-scraper

Algorithmic Benchmark Tool (in progress) — Open source CLI that measures time and space complexity empirically and checks it against theoretical analysis (Big O).

SKILLS

Backend: C#, .NET, Node.js, Express, NestJS, Python, C++
Frontend: React, Next.js, TypeScript, JavaScript, Vite, TanStack Query, Zustand
Data & integrations: PostgreSQL, SQL Server, Supabase, REST APIs, n8n, Salesforce (Apex, SOQL), Mercado Pago API
Architecture & tools: Multi-tenant architecture, data modeling, ETL pipelines, Docker, Cloudflare, Git, Jira
Languages: Spanish (native) · English C1 · Italian A2 · German A1

EDUCATION

B.Sc. in Information Systems · Universidad Nacional de San Juan — 2024 – Present

Full Stack Web Developer · Henry Bootcamp (800 h) — 2023
