PROFESSIONAL SUMMARY

Software Engineer with 3+ years designing full-stack systems for business process automation, B2B integrations, and transactional flows (payments, CRM, messaging). Experienced in relational and multi-tenant data modeling (PostgreSQL, SQL Server) and leading end-to-end web architectures with React, Next.js, Node.js, and C#/.NET. Co-founder of Pulso Studio.

EXPERIENCE

Co-Founder & Software Engineer · Pulso Studio **Feb 2026 – Present**

Technical consulting studio building B2B operational solutions and software architectures (pulsostudio.site).

- Define system architecture and technical stack with clients, balancing operational costs, scalability, and maintainability.
- **Crew:** Scaled an internal tool for a climbing gym into a multi-tenant SaaS for access control and reservations, featuring dynamic QR codes and recurring subscription billing via Mercado Pago API.
- **Compass:** Built an internal operations platform centralizing CRM, agile projects, and financial records using a multi-tenant PostgreSQL schema with Row Level Security (RLS) and TanStack Query optimistic updates.
- **Monteca:** Engineered an insurance policy lifecycle platform (React + Supabase) and n8n automated pipelines for client messaging and renewal notifications.

Full Stack Developer · ANT Automation **Jul 2023 – Mar 2026**

Corporate dashboards and backend services for internal industrial automation platforms.

- Built real-time operational metric dashboards utilizing React, Redux, Material UI, and Highcharts.
- Designed backend services in C# / .NET with Entity Framework over SQL Server, optimizing critical queries for high-volume reporting.
- Modeled and maintained normalized relational databases across multiple operational modules.
- Implemented custom integration plugins for external third-party APIs and containerized local environments with Docker.

Full Stack Developer · Coneq **Dec 2024 – Jan 2025**

- Engineered a responsive, multilingual (i18n) corporate web platform for an engineering firm with SEO and interactive maps.

Front End Developer · QXM (Quien x mi) **Sep 2023 – Dec 2023**

- Developed landing pages and operational dashboards with modular reusable components in React/Angular and NestJS backend.

SELECTED PROJECTS

- **B2B Conversational Agent:** n8n autonomous agent utilizing Claude API on Telegram, integrated with Salesforce (REST, SOQL, Apex) for real-time catalog queries and order creation.
- **Brief:** Automated news platform with scheduled n8n ETL pipelines, PostgreSQL (Supabase), and an automated curated morning newsletter.
- **Mountain Project Scraper:** Web scraper built with Playwright, featuring exponential backoff retries and fallback selectors.
- **Algorithmic Benchmark Tool:** Open-source CLI tool measuring empirical complexity against theoretical asymptotic bounds (Big O).

TECHNICAL SKILLS

Backend: C#, .NET, Node.js, Express, NestJS, Python, C++, REST APIs.

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), Vite, TanStack Query, Zustand, Tailwind CSS.

Data & Integrations: PostgreSQL, SQL Server, Supabase, n8n, Salesforce (Apex, SOQL), Mercado Pago API.

Architecture & Tools: Multi-tenant systems, relational data modeling, ETL pipelines, Docker, Cloudflare, Git.

Languages: Spanish (Native) · English (B2 / Professional Working Proficiency) · Italian (A2) · German (A1).

EDUCATION

B.Sc. in Information Systems (Licenciatura en Sistemas de Información) **2024 – Present (3rd Year)**
Universidad Nacional de San Juan (UNSJ)
